

Installation Guide

1. Clone the repository

```
git clone git@github.com:unsw-cse-comp99-3900/capstone-project-25t2-3900-h18a-date.git  
cd capstone-project-25t2-3900-h18a-date
```

2. Make the setup script executable (first time only)

```
chmod +x setup.sh
```

3. Run the setup script

This will initialise the submodule and install dependencies for both backend and frontend.

```
./setup.sh
```

4. Ensure Docker Desktop is running

Open Docker Desktop and make sure it is running in the background before proceeding.

5. Build and run the application

```
docker compose up --build
```

6. Access the application

- Frontend: <http://localhost:5173>
- Backend API docs: <http://localhost:5005/docs>
